

Powerful Pre-Treatment

Rug Doctor Heavy Stain Pre-Treatment is specially made to tackle the busy carpeted areas of your home. These include carpets near hallways and doorways, which can suffer a build-up of dirt or grease that over time become embedded deep within the carpet's fibres. This dirt is often caused by dirty shoes, or mucky paws from your pets. Begin to fully restore your carpet's original colour with our powerful pre-treatment agent.

Heavy Stain Pre-Treatment should be used before a deep clean using a specialist machine. The soil-lifting cleaning action works by breaking the bonds of embedded dirt and grease, leaving your carpets looking clean and smelling fresh.

Heavy Stain Pre-Treatment can remove:

- Embedded dirt
- Grease
- Soil
- Tar
- Varnish
- Make-up
- Wood stain

How to Use

Generously apply Heavy Stain Pre-Treatment onto heavily soiled areas. Let it rest for 5 to 10 minutes before cleaning with a Rug Doctor carpet cleaning machine.

Safety Information

Contains <5% phosphates, nonionic surfactants, lemon fragrance. In case of eye contact, flush eyes with water for 15 minutes. If irritation persists, seek medical advice.

Keep out of reach of children. Use only as directed, wash hands after use. Avoid contact with eyes.
